

1.0 PRODUCT DESCRIPTION

Available Sizes

- 2 – 12"/DN50 – DN300

Pipe Material

- *Victaulic Aquamine* PVC Pipe

Maximum Working Pressure

- 350psi/2400kPa/24 bar

NOTE:

- Working Pressure dependent on pipe diameter, pipe wall thickness, and general component configuration.

Maximum Operating Temperature

- Reference Service Rating table in [Section 5.0](#)

Function

- Ideal for use on water supply, water bypass, dewatering lines and other water services
- Couplings and fittings designed to join *Victaulic Aquamine* pipe
- Not applicable for compressed air services

2.0 CERTIFICATION/LISTINGS

See [Publication 02.06](#) *Victaulic* Potable Water Approvals ANSI/NSF for potable water approvals if applicable.

ALWAYS REFER TO ANY NOTIFICATIONS AT THE END OF THIS DOCUMENT REGARDING PRODUCT INSTALLATION, MAINTENANCE OR SUPPORT.

3.0 SPECIFICATIONS – MATERIAL

Pipe: PVC 1120 Type 1, Grade 1 (class 12454) conforming to ASTM D-1784 and ASTM D-2241

Couplings: PVC 1120 Type 1, Grade 1 (class 12454) conforming to ASTM D-1784 and ASTM D-3139

Fittings: PVC 1120 Type 1, Grade 1 (class 12454) conforming to ASTM D-1784 and ASTM D-2241,
Carbon Steel conforming to AISI-1026

O-Rings: Polyisoprene (IR) conforming to ASTM F-477

Spline: Nylon – for higher pressure services, Nylon 66 is used.

Style 2970, Style 2971, Style 2972:

Housing: Ductile Iron conforming to ASTM A536, Grade 65-45-12.

Ductile Iron conforming to ASTM A395, Grade 65-45-15, is available upon special request.

Housing Coating: (specify choice)

- ☐ Standard: Black Enamel
- ☐ Optional: Hot Dipped Galvanized conforming to ASTM A123
- ☐ Optional: Contact Victaulic with your requirements for other coatings.

Gasket: (specify choice)

☐ **Grade “E” EPDM**

EPDM (Green stripe color code). Temperature range –30°F to +230°F/–34°C to +110°C. May be specified for hot water service within the specified temperature range plus a variety of dilute acids, oil-free air and many chemical services. UL Classified in accordance with ANSI/NSF 61 for cold +73°F/+23°C and hot +180°F/+82°C potable water service and ANSI/NSF 372. NOT COMPATIBLE FOR USE WITH PETROLEUM SERVICES OR STEAM SERVICES.

☐ **Grade “T” Nitrile**

Nitrile (Orange Stripe color code). Temperature range -20°F to +180°F/-29°C to +82°C. May be specified for petroleum products, air with oil vapors, and vegetable and mineral oils within the specified temperature range. Not compatible for hot water services over +150°F/+66°C or for hot dry air over +140°F/+60°C.

NOTE

- The maximum temperature ratings shown exceed the temperature ratings for *Aquamine* pipe.
- Contact Victaulic for more gasket options.

Bolts/Nuts:

Carbon steel oval neck track bolts meeting the mechanical property requirements of ASTM A449 (imperial) and ISO 898-1 Class 9.8 (M10-M16) Class 8.8 (M20 and greater). Carbon steel hex nuts meeting the mechanical property requirements of ASTM A563 Grade B (imperial - heavy hex nuts) and ASTM A563M Class 9 (metric - hex nuts).

Track bolts and hex nuts are zinc electroplated per ASTM B633 FE/ZN5, finish Type III (imperial) or Type II (metric).

Series 2957 Butterfly Valve:

Housing: Ductile Iron conforming to ASTM A536 Grade 65-45-12

Housing Coating: Orange Enamel

Body: Ductile Iron conforming to ASTM A536 Grade 65-45-12

Body Coating: Standard: Black Enamel

Seat: Victaulic® EPDM (Light Green Stripe color code). Temperature range -30°F to +194°F/-34°C to +90°C.
NOT RECOMMENDED FOR PETROLEUM SERVICES OR STEAM SERVICES.

NOTE

- The maximum temperature ratings shown exceed the temperature ratings for *Aquamine* pipe

Bolts/Nuts: Reference Bolts/Nuts specification under Metallic Coupling

Disc: 316 Stainless Steel conforming to ASTM A351 Grade CF8M

Shaft: AISI 416 Stainless Steel

10-Position Lever Lock Handle: Ductile Iron conforming to ASTM A536, Grade 65-45-12, with zinc-plated carbon steel latch plate and zinc-plated carbon steel fasteners

NOTES

- Aquamine pipe is sold in 20 ft. lengths with one coupling included, but packed separately.
- Specify standard or beveled coupling when ordering.
- Refer to Price List for 'Pipe Only' option.

NOTES

- Working pressure and End Load are total, from all internal and external loads, based on proper coupling assembly with bolts pads metal-to-metal, on *Aquamine* PVC pipe. Couplings are designed to be used with plain end pipe.
- Metric thread size bolts (plated) are available (color coded) for all coupling sizes upon request. Contact Victaulic for details.
- WARNING: Piping systems must always be depressurized and drained before attempting disassembly and removal of any *Aquamine* piping products.

5.0 PERFORMANCE

Maximum Working Pressure for Aquamine™ Pipe and Components at Elevated Temperature

For the maximum working pressure rating of *Aquamine* Pipe and Components at elevated temperature, multiply the working pressure rating shown at 73°F/23°C by the appropriate derating factor (or coefficient if you prefer) in the chart below.

Pressure Capacity Derating Factors for Operating Temperatures Above 73°F/23°C		
at 80°F/27°C	Multiply by	0.88
at 90°F/32°C	Multiply by	0.75
at 100°F/37°C	Multiply by	0.62
at 110°F/43°C	Multiply by	0.51
at 120°F/49°C	Multiply by	0.40
at 130°F/54°C	Multiply by	0.31
at 140°F/60°C	Multiply by	0.22

NOTE

- Derating factors are typical per the pipe manufacturer's recommendation in accordance with ASTM D2837 and PPI TR-3.

5.1 PERFORMANCE

8	8.625	2695	250
DN200	219.1	2331	1724

5.2 PERFORMANCE

Series 2957 Butterfly Valve

Important Installation Considerations

When using the Series 2957 Aquamine™ Butterfly Valve for throttling service, Victaulic recommends positioning the disc no less than 30 degrees open. For best results, the disc should be between 30 and 70 degrees open; this is dependent on the flow requirements/characteristics for the piping system. High pipeline velocities and/or throttling with the disc less than 30 degrees open may result in noise, vibration, cavitation, erosion, and/or loss of control. Contact Victaulic regarding throttling services.

Victaulic recommends limiting the flow velocities for water service to 13.5 feet/second (4 meters/second). Contact Victaulic before installing this valve when higher flow velocities are necessary or specified.

Victaulic recommends good piping practices and installing the valve five pipe diameters downstream of sources of irregular flow, such as pumps, elbows and control valves. If not practical due to space constraints, the system should be designed to locate and orient the valve to minimize the impact of dynamic torque and valve life.

6.0 NOTIFICATIONS

! WARNING

- Read and understand all instructions before attempting to install any Victaulic products.
- Always verify that the piping system has been completely depressurized and drained immediately prior to installation, removal, adjustment, or maintenance of any Victaulic products.
- Confirm that any equipment, branch lines, or sections of piping that may have been isolated for/during testing or due to valve closures/positioning are identified, depressurized, and drained immediately prior to installation, removal, adjustment, or maintenance of any Victaulic products.
- Wear safety glasses, hardhat, foot protection, and hearing protection.
- **DO NOT LOOSEN OR TIGHTEN HARDWARE WHEN THE SERIES 2957 BUTTERFLY VALVE IS PRESSURIZED.**
- The system designer is responsible for verifying the suitability of mating component materials with the intended fluid media.
- The effect of chemical composition, pH level, operating temperature, chloride level, oxygen level, and flow rate on mating component materials shall be evaluated to confirm system life will be acceptable for the intended service.

Failure to follow these instructions could result in death or serious personal injury and property damage.

User Responsibility for Product Selection and Suitability

Each user bears final responsibility for determining the suitability of Victaulic products for their end-use application, in accordance with industry standards, project specifications, and Victaulic's published performance, maintenance, and safety data, as well as all warnings and installation instructions. Nothing in this or any other document, nor any verbal recommendation, advice, or opinion from any Victaulic employee, shall be deemed to alter, vary, supersede, or waive any provision of Victaulic Company's standard conditions of sale, warranty, installation instructions, or this disclaimer.

Installation

Always refer to and follow the [Victaulic Installation Handbook](#) or installation instructions for the product you are installing. Handbooks are included with each shipment of Victaulic products, providing complete installation and assembly data, and are available in PDF format on our website at [victaulic.com](#).

Warranty

Refer to the Warranty section of the current Price List or contact Victaulic for details.

Intellectual Property Rights

No statement concerning the use of any material, product, service, or design is intended, or should be construed, to grant any license under any patent or other intellectual property right of Victaulic or any of its affiliates, or as a recommendation for the use of such material, product, service, or design in the infringement of any patent or other intellectual property right. The terms "Patented" or "Patent Pending" refer to design or utility patents or patent applications for articles and/or methods of use in the United States and/or other countries. Victaulic and all other Victaulic marks are the trademarks or registered trademarks of Victaulic Company, and/or its affiliated entities, in the U.S. and/or other countries.

Note

All products bearing a Victaulic trademark are manufactured by Victaulic or to Victaulic specifications. All products are to be installed only in accordance with the applicable Victaulic installation instructions. Victaulic reserves the right to change product specifications, designs and standard equipment without notice and without incurring obligations.
